

Forerunner
is a Quality Product From

Forerunner
Awnletted Triticale

Cultural Practices

Cultural Practices: As with any crop a good seedbed and seed placement to soil is essential to success. Triticales planted in the fall generally need nutrition similar to winter wheats. Seeding rates should be between 80-120 lbs. per acre. Likewise **Forerunner** seeded in the spring will need nutrition similar to spring wheat. Seed rates should range 80-150 lbs. per acre.
